- > from portugal - aveiro;
- > creating websites, apps and whatnot;

about me

a programmer focused in developing stuff in front-end side of the web (js, ts, react, vue), but also with lots of knowledge in the back-end spectrum (node, php, go, golang etc.)

i find myself as a resilient and committed person in the projects i take part of and i'm always ready to learn new cutting edge tech and work in team

experience

- .fullstack developer: provision of services (Universidade de Aveiro, 2020-2021);
- .fullstack developer: research scholarship (Universidade de Aveiro, 2021-2022);

education

- .master in communication and web technologies (Universidade de Aveiro, 2022)
- .new communication technologies (Universidade de Aveiro, 2017-2021)

skills

programming/software

.proficient/comfortable

.basic

spoken languages

portuguese (native), english.

professional projects

MixMyVisit

.fullstack dev (provision of services/research scholarship - Universidade de Aveiro, 2020-2022)
javascript, typescript, nodejs, react, nextjs, php, laravel, ffmpeg, golang, flutter, postgresql, nginx etc.

.description

The MixMyVisit project is made for public cultural spaces, like museums, in order to enrich the visitor experience and their memory of the visit of the space.

The solution identifies the route of the visitor in the cultural space and creates an automatic video with specific memoirs of the spaces/pieces seen by the visitor.

.self-assessment

During the time I was a research scholar in the MixMyVisit project I consider that my programming skills, front-end and back-end skills, improved a lot because of all the challenges I found. Also, I got a lot of experience with regard of developing in a project with goals, a budget, partners, and responsibilities. Overall, it was an enriching and important experience as a programmer.

personal projects

neverendingfantasy

a simple informational website about the videogames of the Final Fantasy franchise

ts, nextjs, react-query, chakra-ui

development ongoing

<https://github.com/josepsoares/neverendingfantasy>

meepley

a webapp to find people to play boardgames with

ts, nextjs, expo, tamagui, react-query, trpc, prisma, psql

development ongoing

<https://github.com/josepsoares/meepley>

bobo's blog

website where the persona bobo, who is a bird, writes about irrelevant stuff

ts, astro, svelte, tailwind

development ongoing

<https://github.com/josepsoares/bobos-blog>

bobo's zoomeranime

website where the persona bobo, who is a bird, shares their favourite zoomer animes

ts, astro, vue, tailwind

development ongoing

<https://github.com/josepsoares/bobos-zoomeranime>

pokéfav

a website to explore pokémons, pokémon cards and do a quiz about the franchise

ts, reactjs, rtk, firebase, chakra-ui

<https://my-pokemon-project-aa51f.firebaseio.com/>

<https://github.com/josepsoares/pokefav>
